10th - 14th June 2024 - Vienna

15th Session of the Implementation Review Group:

Ideas Regarding the Next Review Phase
Ideas for the next Review Phase

01 Consider the distribution of the following chapters under review

➢ Review the second and third chapter during the first cycle.
➢ The second cycle can focus on reviewing the implementation of the fourth and fifth chapter.
Follow-up on recommendations from the first phase

- Focus on the follow up to the recommendations emanating from the first phase, covering chapters two and third in the first cycle and chapters fourth and fifth in the second cycle.
Enhance the practicality of the Implementation

- Focus can be more on the practicality of such implementations. It can include practical examples of implementation in action and showcasing best practices during implementation.
- This suggestion may require the review of all articles in each chapter, and not just the final recommendations.
Ideas for the next Review Phase

Follow-up on recommendations from the first phase

➢ The second phase can still be two cycles but go through a shorter period for each based on the method of implementation review.

➢ Reconsider the overall duration of the next cycles to be shorter (such as 3-4 years for each cycle).
Ideas for the next Review Phase

05 Reconsider the Review Process

Timeline

- 6 months can be ideal if we focus only on the recommendations made during the first phase. But if we focus on the practicality of the implementation, we have found the previous window of time to be insufficient.

- Set a new timeline at the outset of the next review phase.
Thank you
